Subject: Fw: Dimock sampling update

FYI. Reached out just now.
Mentioned the call tomorrow...will let you know if I get a response.

Subject: Dimock sampling update

Hi Drew -

Just tried to give you a call, but I realize the office is closed (and I don't think I have your direct line).

I wanted to let you know that today EPA shared with residents the results of testing for the first 11 homes sampled during the week of January 23 in Dimock, PA. Each resident was provided with their sampling results. There were detections of some compounds, but not at levels that could present a health concern. Some re-sampling is planned to better characterize the water quality of a handful of wells.

EPA has offered to meet with residents individually to go over their data. As further data becomes available for the remaining homes, we will share the results with homeowners.

We'll talk with you tomorrow at 10 for our previously scheduled call.

Have a good day -
Jennie
